Customs declaration
Fructose

Customs declaration product Fructose

To whom it concerns,

Fructose capsules contain the enzyme Xylose isomerase, Calcium Carbonate (filling aid) and HPMC (capsule).

Within the European union Fructose is regarded as a food supplement to help digest fructose (fruit sugar). Fructose is the natural sugar in several fruits and vegetables. Fructose is absorbed into the bloodstream in the small intestine with the help of a transport protein. The digestive enzyme Xylose Isomerase converts free fructose into glucose, ensuring a 1:1 ratio of glucose and fructose, allowing both to be properly absorbed in the small intestine.

Fructose meets the requirements for food grade enzymes.

With kind regards,
